COLOSSEUM CRYPTO WORLD'S FAIR

projectdulo.com

# Dulo

## The entertainment layer for xStocks. Compete, predict and get rewarded, for points.

SOLO FOUNDER · IRELAND

# Holding xStocks is *boring*

You buy, and the token just sits in your wallet. No activity, no reason to come back, no fun.

## 800,000+

Solana addresses hold a tokenized stock (12 Sep 2026)

Blockworks via Solana Compass

## $220M

of volume on stock-linked Yes/No markets on Polymarket, Oct 2025 to early Sep 2026

Finance Magnates, citing Reuters, 28 Sep 2026

# Three games, *one* Season leaderboard

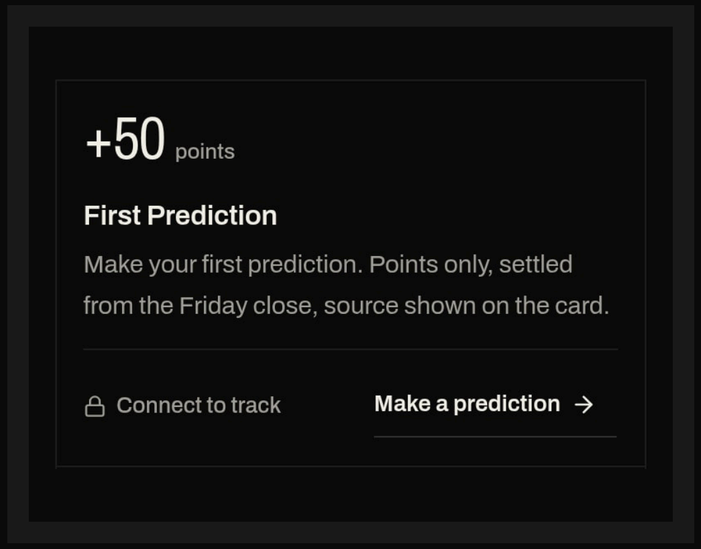

## 01 Predict

Yes or No on a Friday close: will NVDA, TSLA or SPY end above the line?

## 02 Compete

$10,000 of virtual cash every week, live xStock prices, 24/7.

## 03 Complete quests

In Dulo, like this one, or verified from your own wallet. Points only.

# What you hold is public, so it can be *played*

### 01 Holdings are public state

Each quest's proof is a read anyone can repeat.

### 02 Token-2022 ScaledUiAmount

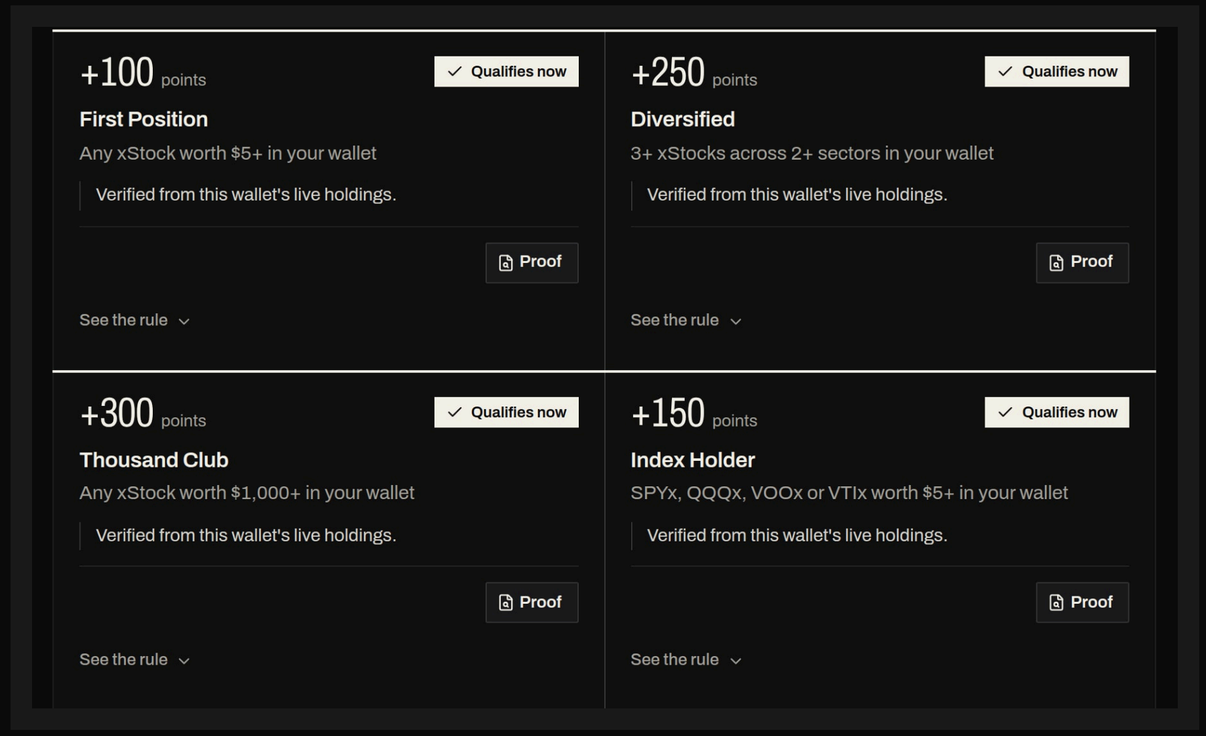

Balances stay right through splits and dividends.

### 03 Jupiter prices, 24/7

Every price shows its source and age.

### 04 No custody

Copy a portfolio opens a prefilled Jupiter swap that you sign in your own wallet.

# Built solo, *live* on mainnet

**21 Sep**
live on Solana mainnet

**9**
predictions settled over three Friday closes

**1,558**
tests run on every push

**21**
live quests: 10 in Dulo, 11 verified on-chain

**Next: the first 100 players, from the tour at projectdulo.com/start**

# Free for players; issuers *would* pay

| | | |
|---|---|---|
| PLAYERS | **Free to play** | Points only, no cash value. 1,000 starter points per Season and $10,000 of virtual cash every week. |
| ISSUERS AND APPS | **Per verified completion** | They would sponsor weekly virtual-cash competitions, and pay only when a holder's wallet really reaches the state a quest describes. |
| LATER | **Real money, if allowed** | Only after demand is proven and after legal advice, through a licensed partner. A paid Yes/No on a stock's close is a binary option, restricted for EU retail. |

# From xStocks to *any* issuer's holders

**TODAY**

The entertainment layer for xStocks.

**NEXT**

The entertainment layer for tokenized assets.

**THEN**

Any app or issuer runs competitions, predictions and rewards for its own holders on Dulo's API, and a player carries one score across them.

**Try the tour: projectdulo.com/start**

If you issue tokenized assets, I'd like to run a first virtual-cash competition with your holders.

Points only, no cash value. Not investment advice. xStocks are not available to U.S. persons or in restricted jurisdictions.
